

Technical Perspectives on Analyst's Rating Changes

DVN case study
02-23-2008

DVN – The TPARC report indicated that DVN was above the 45-degree Bullish Support Line and that it was attempting a major trend reversal. That trend reversal followed through to the upside and a persistent long-term uptrend developed. The stock has gone up about 50% since the TPARC report was prepared.
